

Prompt 1: Summarising Notes

Prompt

Summarise the following DBMS notes into key points suitable for exam revision.

AI Response

DBMS is a software system used to manage databases. It provides data security, data independence, and efficient data retrieval. It reduces redundancy and improves data consistency.

Why it Worked

The prompt clearly specified the topic and requested a concise summary, helping the AI provide focused output.

Prompt 2: Generating a Study Plan

Prompt

Create a 7-day study plan for learning Python basics.

AI Response

Day 1: Variables and Data Types

Day 2: Operators

Day 3: Conditional Statements

Day 4: Loops

Day 5: Functions

Day 6: Lists and Dictionaries

Day 7: Mini Project Practice

Why it Worked

The prompt clearly mentioned the subject and duration, allowing the AI to create a structured plan.

Prompt 3: Creating Interview Questions

Prompt

Generate 5 Python interview questions for beginners with answers.

AI Response

1. What is Python?
Python is a high-level programming language.
2. What is a variable?
A variable stores data values.
3. What is a list?
A list stores multiple items.
4. What is a function?
A reusable block of code.
5. What is a loop?
A structure used for repetition.

Why it Worked

The prompt specified the topic, difficulty level, and required answers.

Prompt 4: Writing a Resume Summary

Prompt

Write a resume summary for a B.Tech CSE student interested in AI and Python.

AI Response

Motivated B.Tech Computer Science student with knowledge of Python, AI fundamentals, and problem-solving skills. Interested in software development and machine learning technologies.

Why it Worked

The prompt clearly described the candidate profile and desired career interests.

Prompt 5: Creating a Lesson Plan

Prompt

Create a lesson plan for teaching Python loops to beginners.

AI Response

Objective: Understand loops

Introduction: Explain repetition

Demonstration: Show for and while loops

Practice: Solve simple problems

Assessment: Write a loop-based program

Why it Worked

The prompt defined the topic and target audience, helping the AI generate an organized lesson plan.
